INSTITUT d'OPTIQUE GRADUATE SCHOOL | Continuing Education
Formation Continue

EF6 | Visual optical measurements

New training

LEVEL: BASIC
Audience: Engineers or technicians required to perform optical visual measurements
Prerequisites: Basic knowledge corresponding to EF1-Optics without calculation will be useful
Pedagogical manager(s): Lionel Jacubowiez - Chargé de cours à l'Institut d'Optique
Language of the training: French
Maximum capacity: 12
Price: 1010€ HT - **Duration:** 2 days - 14 h

Objectives

- Master the principles, methods and instruments associated with visual measurements

Next sessions

- 18 march 2019 au 19 march 2019 - Palaiseau

Addressed topics

Optical instruments
Ophthalmic optics
Experiments on benches, microscopes and glasses

EF6 | Visual optical measurements

The program

Classroom lessons

- Reminders about geometric optics and aberrations
- Optical properties of the eye: performance, limitations
- The various visual instruments: eyepieces, telescopes, microscopes (objectives)
- Choice and implementation of a visual instrument, optimization of resolution and depth of field
- Study of measurement uncertainties

Labwork

- Implementation of a goniometer (angle and index measurements)
- Measurements of focal distances and radii of curvatures. Implementation of a microscope and an afocal telescope

Methodology and assessment

Lectures and exercises with many examples
Demonstrations on laboratory equipment, according to the wishes of the trainees
Labwork on instruments
